

nrmFARM

nrmFARM is a free online farm management program for farmers, horticulturalists, and rural property owners in the Natural Resources SA Murray-Darling Basin (SAMDB) region.

Accessed via a secure log-in, **nrmFARM** is a web based farm management tool which allows users to create and save a map of their property and record farming actions and activities that have been undertaken on it.

nrmFARM allows users to record information including:

- crop and livestock types
- fencing and irrigation
- soil improvement and fertiliser applications
- chemical applications
- animal husbandry activities
- spraying and baiting
- soil test results.

The program is compatible with a very broad range of commodities that are farmed within the SAMDB region and is suitable for farms and rural properties of all sizes.

nrmFARM has been developed in partnership with Natural Resources South East, to be easy and practical to use, and to provide users with the ability to maintain, cross reference and collate farm records either by paddock or property.

How to get assistance

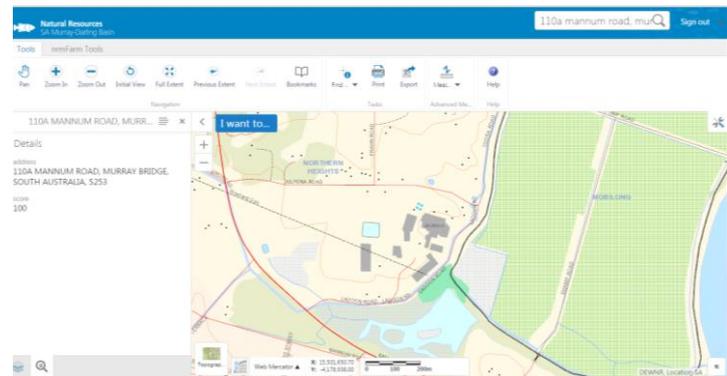

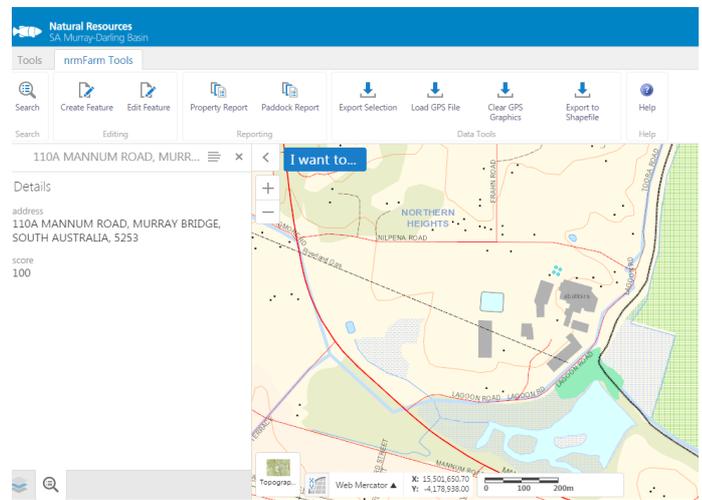

A user guide is available in the help section of nrmFARM. Natural Resources SAMDB will be conducting training sessions throughout 2016 and our staff are available to assist those who wish to take advantage of this fantastic farm management tool.

How to access nrmFARM

If you are a first time user of **nrmFARM** you will need to create a user login and password first. To do this click on 'Manage your Account here' when you reach the sign in page.

To access **nrmFARM** go to the Natural Resources SAMDB website.
