

2014 Regional Snapshot

How many stakeholders are contributing to NRM projects?

Many organisations and individuals work and invest in managing our natural resources. To coordinate these efforts, all partners work towards a shared vision, which is outlined in each regional NRM plan. NRM boards develop these plans for the use and protection of natural resources in partnership with land holders, community groups, industries, government agencies, non-government organisations, researchers and Aboriginal people.

These [partnerships](#) bring together people, networks and resources to deliver projects and maximise the pools of knowledge, skills, and technical and financial capacity.

Most of these projects are [funded](#) by the Australian Government, but diverse [stakeholder](#) contributions and participation are integral to the project delivery. This report summarises the number of stakeholders, and the number and types of groups involved in NRM projects.

State target

Ensure people are better informed and improve capacity in NRM decision making

Trend (2011-13)

Stable

The numbers of stakeholders and group types contributing to NRM projects are stable

Between 2011-13, the number of stakeholders and stakeholder group types contributing to NRM projects remained stable. Between 33 and 43 different stakeholders from 9 stakeholder groups have contributed to NRM projects each year. A small number of stakeholders can achieve good resource management outcomes, but better outcomes are typically achieved if more stakeholders work together.

Where we are at (2013)

Good

On average, individual projects included 4 stakeholders from 3 different group types

The Alinytjara Wilurara NRM Board undertakes projects to conserve native species and landscapes, and to promote the traditional use of the land and engagement of Aboriginal people in NRM.

More than half of Alinytjara Wilurara NRM region is owned by Aboriginal communities, and they partner in most NRM projects (graph on right).

In 2013, there were 20 NRM projects in the Alinytjara Wilurara region and these engaged a total of more than 43 stakeholders, which came from 9 different group types (graph on right). On average, individual projects were partnered by 4 stakeholders from 3 different group types.

Each NRM region has a different strategy to increase and report on its stakeholder base. Not all stakeholders nor their contribution to the delivery of projects are captured in the available data. Future report cards will provide more accurate information on stakeholder's contributions.

Type of groups and the percentage of projects they contribute to in the Alinytjara Wilurara NRM region

Reliability of information

Excellent
