BIOLOGICAL SURVEY SOUTH AUSTRALIA

Government of South Australia DATABASES

GAR Map No: 3687

Figure 3-2

NATIVE GRASSLANDS - Mid North Region

0 20km

- 1 Location of known remnant native grasslands
- 2 Slope greater than 10 percent. Areas likely to have pasture or remnant native vegetation with some native grass component
- 3 Historic distribution of native *Lomandra* spp. (Irongrass) Tussock grasslands

1 The native grasslands category represents all native grassland types, not just *Lomandra* spp. Tussock grasslands.

The information was provided by M.A. Robertson's Lofty Block Bioregion survey work, T.I. Milne's Pygmy Bluetongue research work, Environmental Unit, Transport SA, field work, native grasslands located by M.K. Hyde for World Wide Fund for Nature Lowland Grassland Report (McDougall and Kirkpatrick, 1994), and Planning SA's Floristic Mapping of the Midnorth of South Australia (L.A. Malcolm and M.J. Sherrah, 2000).

2 Land which has a slope greater than 10 percent is not considered to be capable of sustaining cropping.

3 According to R.L. Specht (1972) "The Vegetation of South Australia", based on historic references.

- Native vegetation - tree and shrub cover
- Waterbody
- Ocean
- Softwood Plantation
- Hardwood - Orchard - Vineyard
- Cropland / Pasture with occasional low density scattered trees
- No slope data available
- NPWSA Park/Reserve
- Heritage Agreements

- Sealed road - 2 or more lanes
- Unsealed road - 2 or more lanes
- Sealed/unsealed road - 1 lane
