Senior Historic Architect

Subject:

REGISTER NOMINATION: THE CATHEDRAL HOTEL

45-47 KERMODE STREET, NORTH ADELAIDE

Date:

25 February 1982

SUMMARY

This report was prepared in response to Press reports that the Cathedral Hotel is to be auctioned on March 18, 1982. The interior fittings have been sold. The Hotel licence is pending, subject to the outcome of the auction.

<u>Historically</u>, the building is significant because it is a manifestation of the social and business activity of the late 19th century in Adelaide and North Adelaide.

Architecturally, the Cathetral Hotel is a significant example of a richly decorated corner hotel and its importance is underscored by its completeness, both externally and internally. The standard of design is notable.

Environmentally, the Cathedral Hotel is an important visual landmark on the main approach into and out of the city. Its visual qualities establish and support the character of the area around St. Peter's Cathedral.

The Integrity of the Cathedral Hotel is high both internally and externally. Although the verandah is a 1924 addition, it does not distract from the main building. A second floor addition to the south has been designed with a great sympathy for the original hotel.

The Cathedral Hotel is on the Register of the National Trust as a Recorded Listing.

Recommendations

It is recommended that the Cathedral Hotel, North Adelaide, be included on the Register of State Heritage Items and be categorized Al, A2, A3.

Historical Research - The Cathedral Hotel

The building is an example of a period in the late 19th century when the consolidation of earlier settlement manifested itself in the erection of more imposing buildings. It reflects the growth of business and social activity in the area at the time, and was built on the site of an earlier and humbler inn, the Star and Garter.

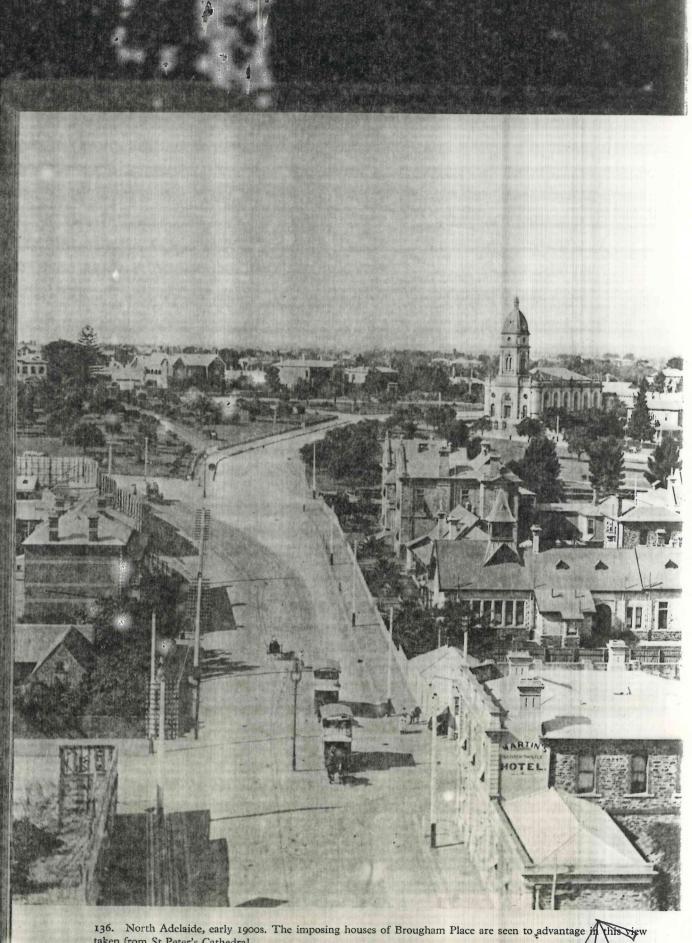

Located at the corner of Kermode Street and King William Road, the Cathedral Hotel was built in 1881. Originally known as the "Scotch Thistle Hotel" it probably provided refreshments and accommodation for travellers bound north, as well as catering for the locals. It appears to have changed names around 1920. In 1924 a verandah was added and a second storey to a southern addition in 1935. The leadlight windows, a feature of the building, may be a later addition made after 1920. In any event, a leadlight window in the downstairs bar, features the nearby St. Peter's Cathedral with the name "Peters Cathedral Hotel".

Locally, the hotel would have provided a point of contact for the people within the area and accommodation for transient workers, but has not attracted as much attention in the available literature as other hotels in the vicinity.
