то:	The South Australian Heritage Committee
From:	Head, European Section, Heritage Conservation Branch
Subject:	REGISTER NOMINATION: SAVINGS BANK OF SOUTH AUSTRALIA CORNER DAWSON AND DONALD STREETS, STRATHALBYN
Date:	28 July 1982

SUMMARY

V

This Report has been prepared as a result of an inspection of Strathalbyn by the Heritage Conservation Branch in relation to a Department of Tourism study of Historic Towns in South Australia. This nomination has been initiated by the Branch.

Historically, the Savings Bank of South Australia Building is significant because it reflects the regional status of Strathalbyn as an economic and trading centre for the rural area surrounding the township. As a Branch of a South Australian Bank it also represents a stage of development in the Bank's operations throughout the State.

Architecturally, the Savings Bank of South Australia Building is significant as an excellent example of Architect A.S. Conrad's work, illustrating a well conveived and well executed design solution. The relative intactness of the interior is also significant.

Environmentally, the Savings Bank of South Australia Building is important as a corner landmark which contributes significantly to Strathalbyn's pleasant character.

The Integrity of the Savings Bank of South Australia Building is very high because of the relating intactness of the building.

The building is listed on the National Trust Recorded List and is contained within the Strathalbyn Conservation Area on the National Estate Register.

RECOMMENDATION

It is recommended that the Savings Bank of South Australia, corner of Dawson and Donald Streets, Strathalbyn, be placed on the Register of State Heritage Items and that it be categorized Al, A2, A3, H2, H3.

HISTORICAL RESEARCH: SAVINGS BANK OF SOUTH AUSTRALIA

The Savings Bank of S.A. building situated on the corner of Dawson and Donald Streets, Strathalbyn, was designed by J. Conrad and built in 1930. The township at the time of the Bank's construction was a well established and important centre for the fertile and productive surrounding area, with Institute Hall, Library, Theatre, Churches, Banks, Flour Mill, Butter Factory, Hotels and Stock Yards. It had originated as a private township situated on parts of land set aside by the Scottish settlers William Rankine and Col. James Dawson, for the purpose in 1840.

A survey plan of the proposed township by E.W. Cross depicts the Presbyterian Church overlooking a central reserve through which the Angas River meanders, with the main road diagonally intersecting the central reserve and surrounding township allotments. ¹ A total of 110 allotments were provided in the initial plan, and neighbouring landholders were granted one town acre for every 80 acres of the rural holdings.

Between 1850-70, the township established itself firmly as the centre of supply for pastoral and agricultural activities on the Angas Plains. During this period a Mill built in 1849 processed local wheat, goldmining commenced in the district, the Britannia Foundry was established by Thomas Rowe in 1855 and Strathalbyn was incorporated as a Municipal Council in 1868. The township reflected both the industry and values of the Scottish settlers in its form and style. It was one of the first country towns in the State to have its own weekly newspaper "The Southern Argus" which shifted there from Port Elliot in 1870, after four years of operation. Despite some changes, the township retains many old buildings and in this upholds the sentiments of "J.E.W." who wrote in the Southern Argus (Jan. 29th, 1914):

> "We have not a big fund to draw upon, the accumulation being those of comparatively few years, and we should be chary of destroying anything which might in future years be of historic importance or interest".

In 1912 the Savings Bank of South Australia rented an office at Lot 17, Albyn Terrace, with Mr. K.M. Torr as Manager. After four years, Block 29 in Dawson Street was purchased at a cost of £150 with the intention of building a handsome banking edifice. Tenders were called for by the Architect, Mr. J. Conrad, in September 1929. From the 28 tenders submitted, Mr. V.A. Trenouth of Ashford was chosen as builder. Built of local quarry stone, the new bank cost £4,000 to construct. The new Branch was officially opened by the Mayor of Strathalbyn, Mr. J.W. Elliott, on the 17th December 1930. At the time the Bank Manager was Mr. C. Letchford.

1. G.R.O. Plan 91 of 1867.

The Savings Bank of South Australia, which commenced in 1848, had utilised telegraphic offices as agencies between 1867 and 1912. The move had been facilitated by the appointment of Mr. (later Sir) Charles Todd as Trustee of the Bank in February 1867, at a time when he was Postmaster General and Superintendent of Telegraphs. Earlier attempts prior to 1867 to establish Branches had not been successful, and the arrangement with local agencies in telegraphic offices worked well until the advent of the Commonwealth Bank Savings Bank Department in 1912. This effectively displaced the Savings Bank of South Australia's right of agency in the local P.O., installing the Commonwealth Savings Bank's agency in its stead. In any event, the use of agencies gave the Savings Bank of South Australia the much needed scope of operation and in 1906 the first Branch had been established at Port Adelaide. Despite the effects of the depression, a marked increase in the number of Branches occurred during the 1930's, with 16 more country and suburban centres converted to full Branch status.

At Strathalbyn, the Branch achieved a total of a million pounds in deposits by December 1958 and a plaque on the building was unveiled by the Mayor, Mr. H.L. Laucke, to commemorate the event.

Historically, the Savings Bank of South Australia reflects the changing development of a South Australian Bank's services to country areas in the State and appears to be a conscious attempt to build according to the tenor of the existing architecture of the town at the time, which has many fine stone buildings. It also reflects Strathalbyn's role as a major centre for the area on the Angas Plains.
