**ITEM NAME:** Port Elliot Railway Station

**DESCRIPTION:** This small railway station building is a timber framed construction clad in weatherboard and a corrugated iron roof. Of particular interest are the wrought iron verandah brackets and semi-circular arches.

**HISTORICAL SUMMARY:** Construction work on extending the horse tramway from Port Elliot to Victor Harbour started in 1863, the contractor being Robert Redman. A stone station was built on the new station site and in 1867 a goods shed was erected (both since demolished). The final, existing development on the site was undertaken by contractor William Essery to plans by the South Australian Railways in 1911, when consideration for passenger facilities had superseded those for freight.

**HERITAGE SIGNIFICANCE:** The railway station was the final development in the early and fascinating rail transport history of Port Elliot, and reflects the growing influence of tourism in the region.
RAILWAY HERITAGE of SOUTH AUSTRALIA

Site Name  Port Elliot Railway Station

STATEMENT OF CULTURAL SIGNIFICANCE

This is not a building of particular architectural distinction but is a good example of a surviving timber clad railway station. The historical significance of the building lies in its history with the south coast railway, in particular with that part of the line from Port Elliot to Victor Harbor.

Significant Interest

- Historical  This is a later addition to the south coast railway line but its historical significance lies in its identification with the history of this line.

- Architectural  Though not an item of great architectural distinction, this item is a good example of very few surviving timber-framed railway stations.

- Environmental  This is not a dominant or landmark item in the town.

RECOMMENDATION

We recommend that the item should be included on the Register of the National Estate.
Railway Heritage of South Australia

Site Name  Port Elliot Railway Station

ANALYSIS OF SIGNIFICANT INTEREST

HISTORICAL

Date  1911

This building represents part of the final chapter in the railway development along the south coast of Fleurieu Peninsula, when the prime function of freight haulage to Victor Harbor had given way to that of holiday makers travelling from Adelaide.

The railway station was the final development in the early and fascinating rail transport history of Port Elliot, and reflects the growing influence of tourism in the region...it would appear that the original passenger station building was retained, and incorporated into the final 1911 development, and was not demolished until June 1960 as a structural hazard (State Heritage Branch Files)

Construction work to extend the horse tramway from Port Elliot to Victor Harbor started in 1863: the contractor was Robert Redman. At the time, a stone station was built on the new station site and in 1867 a goods shed was erected (both have since been demolished). A shelter shed was added in 1887. The final, existing development on the site was undertaken in 1911 by contractor William Essery to plans drawn by the South Australian Railways, when consideration for passenger facilities had superseded those for freight.

On 28 August 1913, the Advertiser reported that the siding had been extended by c.69m and that the platform was to be lengthened 9m, with the width being increased by 3.6m. A new station office in the centre of the platform replaced the older one. There was also an addition of a cream and fish shed. Even by the time of this article, the train passing through the station had acquired the reputation as the 'cockle train'.

Australian National closed the line on 14 January 1986, though it has been re-opened as a tourist railway under the control of Steamranger.

ARCHITECTURAL

Size  Single storey
Wall Materials  Timber framed and weatherboard clad
Roof Form  Hipped/Gablet
Roof Material  Corrugated Galvanised Iron
Window type  Timber-framed, double-hung sash
Other features  Wide eave to form verandah supported by wrought iron brackets and semi-circular arches

Few timber framed railway stations have been identified as being of particular significance.
Site Name  Port Elliot Railway Station

SUPPLEMENTARY INFORMATION

CIRCUMSTANCES

The item is currently leased by the local branch of the National Trust as a Heritage Centre and forms a vital part of the tourist railway between Goolwa and Victor Harbor.

INTEGRITY

The integrity of the item is very high

ENVIRONMENT / PLANNING IMPLICATIONS

This item is not a prominent item, it is some way from the main road connecting Victor Harbor and Goolwa and is located off the Strand.
RAILWAY STATION
PORT ELLIOT

HERITAGE SIGNIFICANCE

Historically, the item represents the final chapter in the area's rail development, when the priority of freight haulage to the busy port of Victor Harbor had been supplanted by the movement of holiday makers to and from the State capital so characteristic of the 20th Century.

Architecturally, the building is a better-than-usual timber framed railway station, with interest being added by the use of wrought iron brackets and "arches". The station platform is of standard construction.

Environmentally, the item is not a strong landmark but is clearly discernible as the station.

The integrity of the item is quite good, showing few alterations and being adequately maintained.

NOMINATION SOURCE/THREAT/OWNER

This report has been prepared in response to a request from the Heritage Committee that the entire Goolwa-Victor Harbor Railway be assessed for the Register. The item is owned by Australia National, but services have ceased on the line and its future is in doubt.

HERITAGE CONSERVATION BRANCH RECOMMENDATION: ...........................................

It is recommended that this item be included on the Register of State Heritage Items, and that it be categorized H3, A3.

SOUTH AUSTRALIAN HERITAGE COMMITTEE RECOMMENDATION: ..........................

Chairman
Register of State Heritage Items
ITEM EVALUATION SHEET
Buildings and Structures

Item: Railway Station
PORT ELLIOT

Age: 1911

Subject:
Present Use Code: 1415 Passenger Shelter
Original Use Code: 1415 Passenger Shelter

Context: Constructed to better service a popular holiday area, replacing an earlier passenger shelter dating from 1865.

Person/Group

Event

Design: A simple timber building with a steeply pitched corrugated iron roof with vented gablets. A central, passenger waiting space, open on the platform side, flanked by enclosed offices at each end.

Construction: Exposed timber frame with weatherboards. Corrugated iron roof, and verandah with wrought iron brackets. Wrought iron semi-circular "arches" add a touch of flair to the waiting room entrance. Brick walls to toilets with small fluted corrugated iron

Interior: to timber framed walls.
Basic exposed timber frame and weatherboards.

Representation: A good example of timber framed railway stations in South Australia.

Continuity: A remote item from the built-up streets of Port Elliot.

Local Character: Fits well with the local character.

Landmark: Not a strong landmark, but clearly discerned as the railway station.

Alterations: Few alterations appear to have been made.

Condition: Generally in original condition and adequately maintained.

Compatibility: Can still adequately fulfil its role as a railway station.
History and Sources

For a community of its size, Port Elliot has enjoyed a rather complex and extensive tram/rail history, which can be divided into three major developmental phases, culminating in the construction of the complex seen today.

The first project involved the original 1853 tramway where the line extended directly onto the jetty at Horseshoe Bay, thus facilitating the promptest possible movement of goods from boat to railway and visa versa. However, for three years materials awaiting transit from the foreshore suffered at the hands of the elements until the Public Works Department authorized the construction of a shelter shed for the storage of goods, that also doubled as a passenger terminus in 1857.

With the completion of the Victor Harbor extension in 1863, the Horseshoe Bay complex was abandoned, as the new line ran directly through the township, and disastrous shipping losses had effectively destroyed whatever credibility the port had enjoyed under its champion Governor Young.

At the new location a stone passenger station was begun in 1864 and completed early in 1865. Once again the damage wrought by nature on unprotected goods necessitated the prompt construction of a goods shed. In his report to Adelaide of 1864, the Superintendent of the line stated: "At Port Elliot a goods shed is very much required for there is no protection whatever for goods left on the roadside". By the end of 1865 the new shed was nearing completion, and by June 1866, the entire complex had been finished, although at somewhat greater expense than the original projection of 500 pounds.

Although sources remain unclear on this point, it would appear that the original passenger station building was retained, and uncorporated into the final 1911 development, and was not demolished until June 1960 as a structural hazard.

The final, and present development occurred on the same site as the previous one. Plans for the present passenger station building were passed by the Chief Engineer of Railways (all responsibility for railway development and maintenance was taken from
History and Sources

The Public Works Department in the late 1870's and given to the fledgling S.A.R.) on the 15 May, 1911, and work was completed a year later. Details as to the costings of the project remain obscure, and the most likely source of information, the South Australian Parliamentary Papers, remain cryptic about this.

The use of light timber framed construction for a railway station was unusual, and it must be presumed that by 1911 Port Elliot had become insignificant as a freight station, and had taken on its modern role as a tourist stop. The S.A.R. thus went to a minimum of expense in providing passenger facilities which were to see only seasonal use by weekend recreational passengers.

SOUTHERN AUSTRALIAN HERITAGE ACT, 1978

Entry of Items on the Register of State Heritage Items

There has been an increased community awareness of the need to protect those buildings and features of our State which reflect our cultural heritage. The South Australian Government has recognised that awareness by passing the South Australian Heritage Act, 1978, for which the Minister for Environment and Planning is responsible. In accordance with the provisions of the Act the Register of State Heritage Items is being compiled.

Where the Minister considers that an item (defined as any land, building or structure) that is not on the Register is part of the physical, social or cultural heritage of the State and that the item is of significant aesthetic, architectural, historical or cultural interest, then the Minister may enter that item on the Register.

Pursuant to the provisions of the South Australian Heritage Act, 1978, 1. Don Hopegood, Minister for Environment and Planning and Minister for the time being administering the said Act, hereby give notice that I have entered on the Register of State Heritage Items and the items described in The Schedule hereunder.

Items listed in The Schedule were previously placed on an Interim List in accordance with the provisions of section 15 of the South Australian Heritage Act, 1978. Exempt items owned by the Crown and those within the area of the corporation of the city of Adelaide, the remaining items listed in The Schedule are subject to Part V of the Planning Act, 1982. That Act requires that no development including demolition, conversion, alteration of, or addition to any item, is permitted without the written consent of the relevant Planning Authority. Items within the area of the corporation of the city of Adelaide are subject to the provisions of the City of Adelaide Development Control Act, 1978.
