

JOURNAL of the ADELAIDE BOTANIC GARDENS

ISSN 0313-4083 (Print) • ISSN 2201-9855 (Online) • flora.sa.gov.au/jabg

Guidelines to authors

The **Journal of the Adelaide Botanic Gardens** is an open-access, peer-reviewed journal published by the State Herbarium of South Australia on behalf of the Board of the Botanic Gardens and State Herbarium (Adelaide, South Australia). The Journal is available online at flora.sa.gov.au/jabg and through JSTOR.

Articles are abstracted and indexed in the following databases: Abstracts of Mycology, Agroforestry Abstracts (Online), Biological Abstracts, BIOSYS Previews, CAB Abstracts, Crop Physiology Abstracts, Forestry Abstracts, Horticultural Science Abstracts, Kew Index of Taxonomic Literature, Ornamental Horticulture, Plant Breeding Abstracts, Plant Genetic Resources Abstracts, Referativnyi Zhurnal.

Scope

The Journal of the Adelaide Botanic Gardens accepts papers in the following categories:

- plant systematics, taxonomy and nomenclature of plants, algae and fungi
- evolution and biogeography
- descriptive plant morphology and anatomy
- plant biology, genetics, and ecology
- obituaries, biography and history
- bibliographic studies, book reviews
- botanical illustrations.

Focus of the journal is on taxa from the Australasian region, but manuscripts from other regions of the world may be considered.

Descriptions of single taxa are accepted, as well as revisions and full length papers. There is no page limit, but authors should inform the Editor if they intend to submit larger manuscripts. Larger manuscripts may also be submitted for the Journal of the Adelaide Botanic Gardens Supplement series. All submitted papers are refereed by two referees.

Submission

Papers will be considered only on assurance that they are not being considered by another publication and will not be withdrawn without consent of the Editorial Committee.

Manuscripts should be submitted to the Editor electronically as a Word document (.doc, .docx) or in Rich Text Format (.rtf). Consult the Editor where uncertain on style. The Editorial Committee may return submitted manuscripts to bring it to standard.

Address for submissions:

Dr Jürgen Kellermann
Editor, Journal of the Adelaide Botanic Gardens
State Herbarium of South Australia
P.O. Box 2732, Kent Town S.A. 5071, Australia
E-mail: juergen.kellermann@sa.gov.au

Style

Authors should follow the format in the most recent volume, noting title, authorship, abstract, heading, references, in-text publication referencing, etc.

Italicise in the text the following: scientific names, the short-hand designation of a herbarium collection (see below), journal and book titles in text and References. Do not italicise in text and References standard abbreviations of Latin origin, such as: e.g., loc. cit., p.p., s.dat., et al., etc. Format in synonymy differs (see below).

Keys. Indented keys are preferred to bracketed keys.

Synonymy. Full lists of synonyms and invalid names, with references to application in significant historical publications, are encouraged. It is recommended that:

- nomenclatural (homotypic) synonyms be placed chronologically in same paragraph, synonyms separated by a period and em-dash; taxonomic (heterotypic) synonyms, then misapplications and invalid names, follow in separate paragraphs
- type details be dealt with at the end of each paragraph grouping nomenclatural synonyms, or in a separate section titled Typification.
- authorities be abbreviated according to Brummit & Powell's (1992) *Authors of Plant Names*, and its updates in the *International Plant Names Index* (www.ipni.org)
- Latin phrases and abbreviations not be italicised, e.g. auct. non., nom. inval.
- references not be italicised and have consistent abbreviations of book and journal titles. Books titles are to be abbreviated following Stafleu et al. (1976–) TL-2 and TL-2 Suppl. Journal titles are to follow Bridson & Smith (1991), B-P-H/S; abbreviations are available online through IPNI; citation of volume, date and pagination have to be consistent, and either in the form "Benth., Fl. Austral. 4: 111 (1868)" or "Benth., Fl. Austral. 4 (1868) 111".

Citation of specimens. In general text use the abbreviated method (collector name and unique collection number, e.g. *J. Smith 1234*) or, where lacking a number, collector name and the date and/or herbarium sheet identifier, italicised. Full citation of specimens should follow the treatment of each taxon, with a selection of 10–30 specimens, grouped by country, state and region, ordered either alphabetically by collector and number or north to south, west to east by locality.

Voucher specimens need to be lodged in recognised herbaria.

Phrase names. A new phrase name will only be agreed if publication of a formal Latin name is not practical, if no alternative exists, and if there are strong (e.g. conservation) reasons for establishing one. The format should follow that set by Australian herbaria: B. Barker, *Austral. Syst. Bot. Soc. Nsltr* 122: 12–13 (2005).

References. See most recent volume for reference style. Cite Web pages and Databases in text in abbreviated form with Date, as with bibliographic References. In References cite Web pages in the form: Author or Organisation (Date). Title. Web-address [accessed: date]; cite Databases in form requested by the owner, or by: Abridged name (Date). Title. Institution. Web-address [accessed: date]. Gene sequences must have a GenBank accession number and specimen voucher number.

Publication & copyright

Following the reviewing and editing process, new articles are published online as soon as possible. The online publication date is indicated on the first page of each article. Hardcopy, collating all articles published during a calendar year, is printed at the start of the following year. The printed Journal is distributed to exchange partners and available for sale (contact the Editor for more information).

Publication in this Journal is conditional on licence being given to publish both in a printed journal, electronically on the web, or in other form approved by the Crown through the cited copyright holders: Board of the Botanic Gardens & State Herbarium (Adelaide, South Australia) and the Department of Environment, Water and Natural Resources (Government of South Australia).
